

Somnia TruthMarket

Autonomous Multi-Agent Prediction Markets on Somnia L1

AGENTATHON 2026

SOMNIA L1

Made with GAMMA

The Oracle Trilemma in Prediction Markets

HOW DO YOU SETTLE A FACTUAL BET WITHOUT TRUSTING ANYONE?

CENTRALIZED ORACLES

Fast, cheap — but a single point of failure and opaque.

Fast finality

Low cost

Single point of failure

Opaque and un-auditable

HUMAN DECISION

Decentralized — but slow, expensive, and prone to collusion.

Decentralized by design

Context-aware decisions

Slow resolution

Expensive and prone to collusion

DEFI REALITY

Most prediction markets rely on one of the above, renouncing either trust or efficiency.

Must choose: trust or efficiency

No ideal middle ground

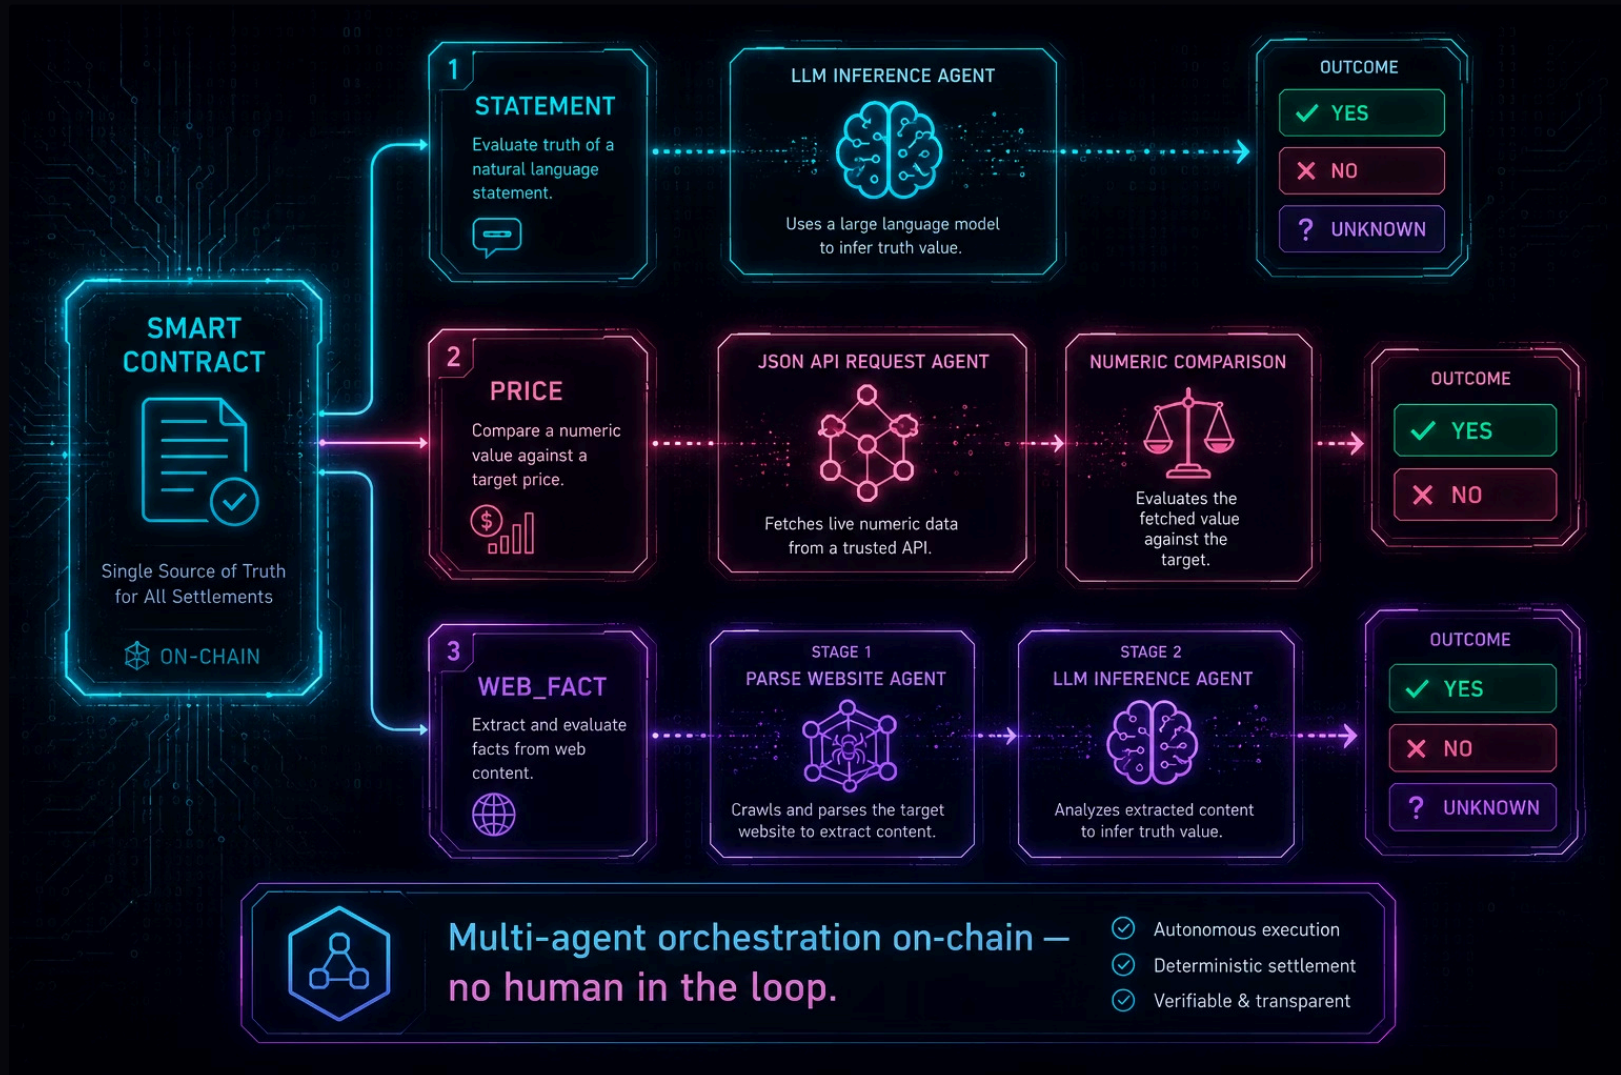

The status quo forces a trade-off.
There has to be a better way.

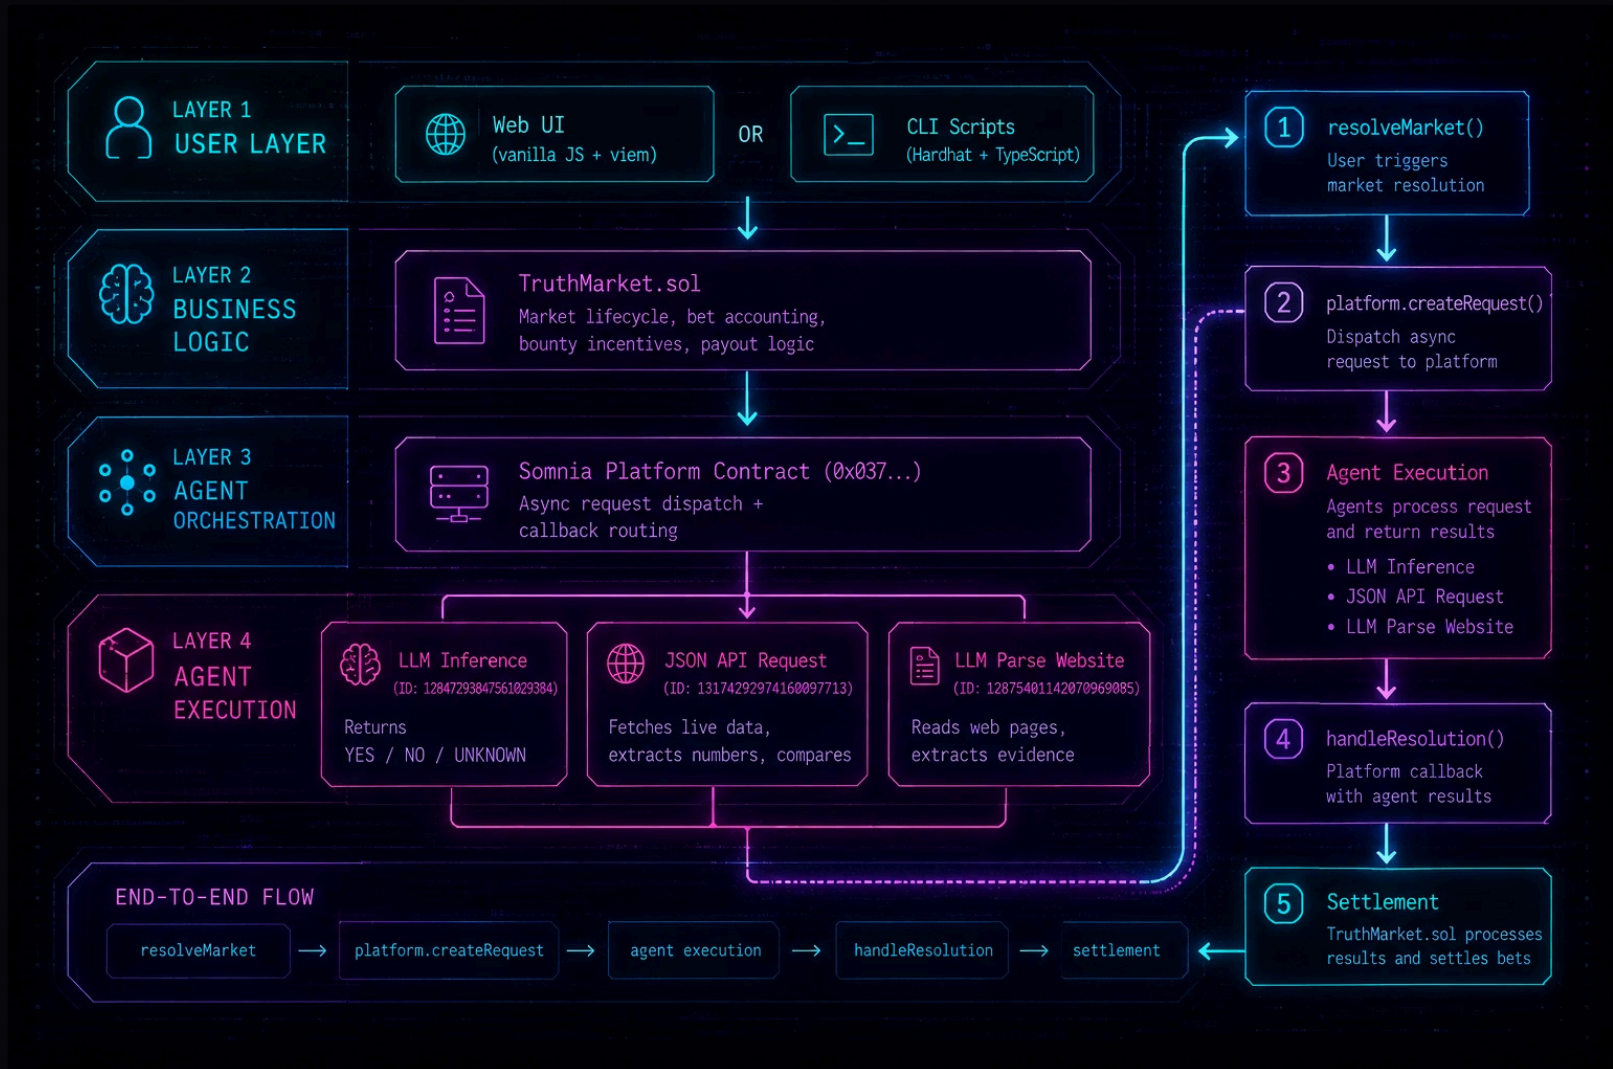

SOMNIA AGENTIC L1: VERIFIABLE. TRANSPARENT. DECENTRALIZED.

TRUTH, SETTLED BY AGENTS.

TruthMarket — Agents as Oracles

Smart Contract + Agent Infrastructure

Three Flavors of Truth

SOMNIA TRUTHMARKET — LIVE DEMO

Autonomous micro prediction markets. Powered by Somnia Agentic L1.

1. STATEMENT

Simple, fast, effective.

SETTLED

LLM INFERENCE

Market ID	Outcome	Resolved
1	YES / NO / UNKNOWN	YES

QUESTION / STATEMENT

2 + 2 equals 4.

AGENT FLOW

RESULT

LLM Verdict	Confidence	Resolution Time
YES	0.98	4.2s

MARKET OUTCOME

WINNER: YES Bounty Paid
Payouts sent to YES pool **0.02 STT**

TX HASH [0x7AF...9C3B3](#)

2. PRICE

JSON API fetches CoinGecko, compares, settles.

SETTLED

JSON API AGENT

Market ID	Question	Resolved
2	Is BTC above 100K USD?	YES

AGENT FLOW

DATA FETCHED (COINGECKO)

Endpoint	https://api.coingecko.com/api/v3/simple/price		
Data Path	bitcoin.usd		
Fetch Price (USD)	104,237		
Compared To	100,000		
Result	104,237 > 100,000	YES	

MARKET OUTCOME

WINNER: YES Bounty Paid
Payouts sent to YES pool **0.02 STT**

TX HASH [0x9B2...4E7F](#)

3. WEB_FACT

Parse Wikipedia -> Chain to LLM -> Verdict.
Multi-agent orchestration.

SETTLED

PARSE -> LLM CHAIN

Market ID	Question	Resolved
3	Did Satoshi Nakamoto create Bitcoin?	NO

AGENT FLOW

SOURCE (WIKIPEDIA)

URL	https://en.wikipedia.org/wiki/Satoshi_Nakamoto
Extracted Evidence (snippet)	
"Satoshi Nakamoto is a pseudonymous person who created Bitcoin..."	
The true identity of Nakamoto has not been verified."	

LLM VERDICT

Verdict	Confidence	Resolution Time
NO	0.91	18.7s

MARKET OUTCOME

WINNER: NO Bounty Paid
Payouts sent to NO pool **0.02 STT**

TX HASH [0xC1D...72A93](#)
